PeeGone

Enzyme Action Formula to Eliminate Stains & Odours

PeeGone's natural enzymatic formula works to effectively and safely eliminate stains and odours caused by dogs, puppies, cats and kittens. Unwanted stains and odours caused by urine, faeces, vomit and drool will no longer be a problem and can be applied onto multiple surfaces in and around your home and is also great for cleaning out kennels and cat litter trays.

- ✓ Contains bio-digesting ingredients which effectively eliminate pet smells, urine stains and breaks down organic waste
- ✓ Biodegradable and non-toxic
- ✓ Safe
- ✓ Apple scented
- ✓ Natural Bio-enzymatic technology
- ✓ Australian Made

PeeGone is safe to use on thick carpets, bedding or any area that needs saturation to remove unwanted stains and odours. It also has the added benefit of being safe to use on everyday household spills.

DIRECTIONS FOR USE

Soft Surfaces - carpet, rugs, mats, fabric furniture (Spray & Super Soaker)

Use paper towels to remove excess urine or waste. Do a colourfast test on an out-of-sight small area and then saturate the affected area and allow to air dry. When the final application has dried, apply a small amount of water to the area and wipe over with a paper towel, the surface should now be clear of any stains and bad odours.

Hard Surfaces - wood, laminate, vinyl, tiles, plastics and hard furniture (Spray)

Use paper towels to remove excess urine or waste. Once removed, apply 1 to 2 sprays depending on the size of the affected area, then wipe off with a paper towel.

Kennels & Cat Litter Trays

Kennels: Remove all inside bedding and dispose of any excess hair and waste. Once the surface is bare, apply **PeeGone** liberally to all surfaces and leave on for 2 minutes. You can then rinse off with water and allow to air dry in the sun or dampen a cloth or paper towel with water and wipe off.

Litter Tray: Remove any faeces then apply only 1-2 sprays from a reasonable height ensuring to cover the litter surface, leaving a pleasant apple scent. Also suitable to spray onto the surface of the emptied tray during litter clean-outs, be sure to wipe or rinse off with water prior to adding new litter.

CLINIC SELL TIP'S

PeeGone is a great product to offer your clients to take home if their pet is prone to having 'accidents' inside the home. With the added benefit of being a safe product, Australian made and affordable, we'd recommend having **PeeGone** available for purchase in the retail display of your clinic.

CLINIC USE

With accidents occurring from time to time in clinic reception and consultation rooms, we'd recommend having a bottle behind reception and in consult rooms. The 2.5L refill size can easily be decanted into smaller in-house spray bottles, then placed strategically around the clinic for use.
