

OTIDERM

WOUND CLEANSING SOLUTION AND EAR CLEANER

INDICATIONS:

Removal of accumulated wax deposits and for use as an adjunct in the treatment of otitis externa.

As an aid in the removal of necrotic tissue, coagulum and debris from wounds in horses, dogs and cats.

CONTRAINDICATIONS:

Ruptured ear drum.

COMPOSITION:

Propylene glycol 415mg/mL, malic acid 22.5mg/mL, benzoic acid 1.5mg/mL, salicylic acid 0.37mg/mL in a pH 2.3 base.

DIRECTIONS FOR USE:

EARS: Apply OTIDERM liberally into ear canal. Gently massage base of ear to help break up accumulated internal wax and crust. Use cotton or absorbent material to clean excess solution and debris from open area of ear. Apply once or twice weekly or as directed by your veterinarian. To rule out the possibility of other ear problems, it is important to obtain the correct diagnosis before commencing use of the product.

SKIN: Apply liberally to clean the wound.

PRESENTATION:

125mL clear bottle with nozzle and 500mL bottles with trigger sprays.
