

Cortavet

Cutaneous Spray Solution for Dogs

Vetsense Cortavet is a topical medicated spray used for the symptomatic relief of inflammation and pruritic skin conditions in dogs.

KEY BENEFITS/PROPERTIES

- ✓ **Active Ingredient:** Each mL contains 0.584mg of Hydrocortisone aceponate (HCA).
- ✓ **Rapid Absorption**
This product is rapidly absorbed and does not require any massage or rubbing.
- ✓ **Itching Relief**
Helps to manage a variety of pruritic skin diseases including atopy, FAD and food allergies. Prevents further skin damage, helping break the itch-scratch cycle.
- ✓ **Anti-Inflammatory Effect**
HCA is a diester that acts locally in the skin with minimal systemic absorption, providing strong anti-inflammatory effects in the epidermis without causing dermal or systemic side effects.
- ✓ **Suitable for Localised Skin Lesions**
Designed to treat specific areas of inflamed skin (i.e. hot spots, etc), rather than whole-body treatment.
- ✓ **Easy Spray Application**
Delivered via pump spray without needing massage/rubbing.
- ✓ **Prescription medication.**

STORAGE:

Store below 30°C (room temperature). Protect from light.

PACK SIZES: 31mL, 50mL and 76mL.

APVMA No.: 94998/144421

DIRECTIONS FOR USE

PRESCRIPTION MEDICINE ONLY.

For use by or under direction of a veterinarian.

RESTRAINTS

DO NOT USE on food producing animals.

CONTRAINDICATIONS

DO NOT USE on cutaneous ulcers.

SAFETY DIRECTIONS

WARNING

May cause birth defects.

CAUTIONS

Will irritate the eyes. Avoid contact with eyes. If product in eyes, wash out immediately with water. Wash hands after use.

May cause birth defects.

Flammable. Do not spray on naked flame, incandescent material or smoke while handling product. Spray in a well-ventilated area.

DOSAGE AND ADMINISTRATION

Apply topically to the skin. If the area is covered with hair, clip it before treatment. Attach the pump to the bottle before use, then spray the product onto the affected area from about 10 cm away.

The recommended dose is 1.52 $\mu\text{g}/\text{cm}^2$ of hydrocortisone aceponate/ cm^2 of affected skin per day. This dosage can be achieved by two pump activations over a surface area to be treated equivalent to a 10 cm x 10 cm^2 . Repeat the treatment daily for 7 consecutive days.
